

PP Classic Waterproof Protective Case

MEIJIA, a professional PP classic waterproof protective case factory and exporter in China, supply supply protective cases with high quality and good price for people all over the world. The MEIJIA PP classic waterproof protective case, not only portable, but also elegant and fashionable, meets the people's needs of aesthetic, and is available to be used to protect valuables and precision equipments in a variety of scenarios. Looking forward to having you as our long-term partner.

MEIJIA PP classic waterproof protective case, made in China, is a portable plastic case. The case is made of modified PP engineering plastics and has the feature of elasticity, tough and strength, and that makes the case available to protect the objects inside. The high quality of the MEIJIA PP classic waterproof protective case provides a guarantee for the user to safely transport their precision equipments and valuables, so that the users have no need to worry about the collision and bump on the trip. The color of the PP classic waterproof protective case is elegant black, which could meet the aesthetic needs of most users in the world. Besides, the PP classic waterproof protective case is waterproof, which means it can work well in a situation that is wet or even full of water.

MEIJIA PP classic waterproof protective case Introduction

Model: MJ-5019/1550-20.62'

MEIJIA is a large-scale factory and exporter specializing in the production and export of tool boxes, fishing boxes and tool kits made of plastic (PP), aluminum and cloth in China. The factory covers an area of 110,000 square meters. The annual sales have reached 30 million US dollars. Having dozens of technical engineers, technical backbones, new product research capabilities and market competitiveness, the production technology of MEIJIA is extremely strong, and MEIJIA has ISO9001, GS quality system certification. The shockproof classic waterproof protective case is one of the MEIJIA's hot-selling products.

The PP classic waterproof protective case is a classic protective case made of modified PP engineering plastics, which is waterproof and hard to be broken. In recent years, PP classic waterproof protective cases have been widely used in police, military, photography, medical treatment and other fields. And the materials of protective cases, at present, are mainly ABS plastics and modified PP engineering plastics. However, the protective performance of ABS plastic is inferior to PP engineering plastics, because the ABS plastics lack sufficient elasticity, and is relatively brittle and hard on the senses. PP engineering plastics based

on PP plastics and improved the properties of its flame retardancy, strength, impact resistance, toughness, etc., and are superior materials for the production of protective cases. Of course, the cost of PP material will be relatively high. Thus, considering the our customers' needs of high-quality cases, we use the superior material of modified PP engineering plastics. Although the product itself does not have an absolute price advantage, its high-properties of wear resistance, drop resistance, and low temperature resistance are chosen by more people.

MEIJIA PP classic waterproof protective case Parameter (Specification)

Messages

- 20.62' plastic portable toolbox
- one plastic handle
- two plastic buckles in front of box
- two stainless steel security keyhole
- Water Proof and Shock Proof
- Outside Size: 524x428x206mm (20.62' x16.87' x8.12')
- Inside Size: 468x355x193mm (18.43' x14' x7.62')
- Cover Inner Depth: 44mm (1.75')
- Bottom Inner Depth: 149mm (5.87')

reinforced by the stainless steel.

Easy To Open With Latches Design

Smarter and easier to open than traditional cases. Start the release and offers plenty of leverage to open with a light pull in just seconds.

High Quality Auto Exhaust Valve

Solve the problem that the box can not be opened or deformation due to the difference of internal and external air pressure and keep water molecules out.

Portable Handle Design

Easy to go with our portable handle design. Ergonomic structure design to ensure beauty and comfort. Durable use with the solide construction.

Customisable Foam Inserted

Use the convoluted foam for cover and pad foam for base. And according to the size of your valuables, you can configure the interior pre-cut pull and pluck cubic foam to fit and keep the valuables from shocks and bumps on the road.
